Steel-Line's SECTIONAL DOOR

Make a **bold** impression with a stunning Steel-Line sectional door.

Enhance the exterior of your home with a garage door that will complement any style of architecture. Steel-Line has a range of door styles to suit the unique characteristics of your home. Choose from the stylish Heritage, Ranch, Slimline, Glacier or Flatline door styles and then select the finish of your choice to really dress up and enhance the exterior of your home.

Your garage door is possibly the largest exterior feature of your home so the right colour and finish treatment are essential. In addition to the full range of Dulux® Powdercoat and Colorbond® colours, Steel-Line also offers a unique range of DecoWood® timber finishes allowing you to match your garage door to other external finishes.

Steel-Line's sectional garage doors have exceptional weather-resistant qualities. They are resilient against wind and dust conditions and come with tough PVC weather seals and heavy duty aluminium bottom rails, so you can trust that the precious contents of your garage are protected at all times.

DECOWOOD®

Steel-Line's innovative range of DecoWood® sectional doors combines the look and feel of genuine timber with the strength and security of steel.

Unlike timber, a DecoWood® sectional door won't warp, shrink, splinter or rot. They don't need any ongoing treatment, and unlike the trees that were saved to create your DecoWood® sectional door, it is completely impervious to termites.

Made from high quality Australian BlueScope® Steel, the DecoWood® sectional door offers all the security and peace of mind that you have come to expect from Steel-Line garage doors. The DecoWood® sectional door is tough enough to endure the extremes of Australia's harsh weather conditions.

The DecoWood® sectional door is available in a choice of nine true Australian timber hues, which are applied using powder coating and special polymers in a process exclusive to Steel-Line. The end result is an extremely natural looking, three-dimensional, textured timber finish at less than half the price you would pay for timber.

Let your garage door make a bold fashion statement with one of our DecoWood® sectional doors for that perfect finishing touch to your home with true designer style.

SAVANNAH®

The look and feel of a smooth finish sectional door with the added strength and durability of BlueScope® 0.6mm G300 high strength steel.

Stylish, strong and durable. Steel-Line's innovative Savannah® range delivers a smooth finish in a wide range of customised door designs. The Savannah® is made from BlueScope® Steel G300 coil delivering a far smoother and virtually blemish and shadow free finish compared to most competitors' smooth finish doors which are made from softer G2NS steel. If quality, durability and a genuinely smooth door are important, then make Savannah your choice because the decision you make today will be with you for many years.

Steel-Line's Savannah® range of doors is available in three designs – Slim-Line™, Glacier™ and Flat-Line and in five Colorbond® colours as well as in a DecoWood® finish. Although the Savannah® may be more expensive than other smooth finish garage doors, the quality of the door and its smooth finish make it real value for money that will stand the test of time.

SECTIONAL DOOR OPERATORS

Fit your Steel-Line sectional door with a genuine automatic operator from Boss for hassle free entry to and exit from your garage.

All Boss operators are engineered to the highest standards ensuring easy operation, optimum performance, long life and peace of mind.

B/OL4

B/OL6 Chain Drive

B/OL6 Belt Drive

Soft Start and Stop Function

This feature is designed to allow for a quiet and smooth door operation, which is important when the garage is located close to bedrooms or living areas. Only available in B/OL6 operators.

Door Stop Programming

This convenient feature allows for the door to be stopped at any height for the purpose of ventilation or pet access.

Auto Reverse System

For added safety, each installation comes with this automated feature that causes the garage door to immediately stop and reverse when it comes into contact with an object.

Courtesy Light

This courtesy light is the most convenient way to navigate through your garage and to get in and out of your car. The light automatically switches on and off as you open and close your door.

In-built Safety Timer

This automatic close timer will ensure that your door will close automatically (with optional photo eye beams installed) if you forget to close it yourself. This is a fantastic security feature that will ensure peace of mind.

Remote Handset

The most effective way to open and close your garage door. They are lightweight and can be programmed with up to 1.2 million transmitter code combinations.

Quality and Adaptability

Boss garage door operators are manufactured from quality composite materials, and are approved to the latest world-wide standards. They can also be fitted to most popular brands of sectional doors with accessories to suit your requirements.

Warranty and Service

Approved to world-wide standards and covered by a 5 year motor warranty.* Experienced service technicians provide repairs and replacement parts for your new or existing garage door, motor or remote.

* Please see Steel-Line's standard warranty conditions in relation to automatic operators.
1 year on electronics
Door must be serviced annually or warranty will be void.

Quality Features That Will Stand The Test Of Time

For many years Steel-Line's range of garage doors has set the benchmark for style and quality throughout the Australian garage door industry.

Most Steel-Line sectional doors can be automated for ease of use. As a market leader in safety and innovation, all of Steel-Line's automatic door openers come with a range of safety features. The standard 'Auto Reverse System' causes the garage door to immediately stop and reverse when it comes into contact with an object, while the optional 'Photo Eye' feature automatically reverses the closing door if its electronic beam senses an obstruction. Furthermore, to ensure smoothness of operation and one of the quietest garage door mechanisms available, Steel-Line uses specially designed composite nylon and steel hinges.

Finger Proof Safety

Steel-Line's sectional doors feature a curved finger proof joint for added safety. This unique award-winning design not only safeguards your family against serious injury, it seals out elements that can penetrate conventional doors.

Heavy Duty Bottom Rail

Every Steel-Line sectional overhead door is fitted with a sturdy heavy duty bottom rail to increase strength in the lower part of the garage door. A tough and durable weather seal is added to the bottom rail for extra protection from the elements.

Strong and Quiet Operation

To avoid the harsh sounds of metal-on-metal, Steel-Line uses hinges made of specially designed composite materials such as nylon for smooth, quiet and trouble free operation.
